

Improving the Local Economy One Business At a Time

We at the *Woman Today* magazine have long recognized that the heart of the economic climate is vitally linked to the success of locally owned businesses. In this issue and going forward, we want to continue to focus on area businesses who are hiring new employees, adding to their buildings, moving to a different location, bringing in new products, or otherwise enhancing the business climate in the area.

Bronhilda Miketin - Apolonia B Skin Cream

Apolonia B Skin Cream Old World Family Formula

Apolonia B Skin Cream was developed by Bronhilda Miketin who came to the United States in the mid-sixties from Yugoslavia. She eventually settled in Duluth.

Bronhilda's grandmother, Apolonia, was an herbal pharmacist in Yugoslavia for her entire lifetime. She taught Bronhilda the information and technique she would use many years later to develop Apolonia B Skin Cream. "I wanted to honor her by naming the cream after her," says Bronhilda. "I remember when I was growing up that people would come to her all the time for this cream. Even doctors came. As a young girl, I wanted to grow up and help people the way that she did."

Apolonia B is a 100 percent natural, steroid and chemical free skin cream that has successfully been used for everything from skin conditions like psoriasis to skin wound irritations like insect bites and chemical burns. Patients have used Apolonia B for all types of flaking, scaling, and dry skin conditions such as eczema, rosacea, burns, skin ulcers, bed sores, acne, irritations, and aging of the skin.

Steve Preston R.Ph., owner of eight area pharmacies, says, "I've been a practicing pharmacist for 34 years, and I fully endorse this product. Falk's Pharmacies have sold 1,000 jars in the previous twelve months in our seven retail pharmacies." ♦
